Abortion Trauma Truth Exposed

GOALS

- 1) Clarify messaging & dialog
- 2) To add to the healthcare plank in the platform:

"We believe women have the **right to know** and receive **full disclosure** of all **lifelong risk factors of their reproductive decisions, including abortion trauma.**"

We commit to putting science and worldwide empirical research over ideology so that women can make fully informed reproductive decisions impacting their **lifelong healthcare.** **Abortion is trauma.**"

Women's Right to Know legislation that adds this clause:

"Women who cannot care for unwanted children should be encouraged to use the Safe Haven laws* in every state."

* www.safehavenalliance.org

Seriously?! How have we come to the place where we have allowed abortion to become an accepted form of domestic violence and abuse against women and children?

We believe that by **educating** women, men, and the general population of these **risk factors** we are able to provide an extra layer and hedge of **protection** around our children, including the unborn.

S.M.A.R.T Women's Healthcare Advocates

Exposing the lifelong healthcare impact of abortion trauma based on the **best available science**

We are in unprecedented times with the recent development into Planned Parenthood practices.

Women deserve that we take a closer look.

Authenticated videos: On September 29, 2015, before Congress, the record states:

"According to an independent forensic analysis of Center for Medical Progress' recorded media files indicates that the video recordings are authentic and show no evidence of manipulation or editing."

Abortion Trauma Truth Exposed

We are a national network of personal testimonies; friends of the court, featured in Amicus Briefs, including local and national legislative hearings.

We are changing the dialogue and discussion advocating for women's lifelong healthcare and well-being.

We educate and consult legislators in best practices: "When they say, you say" coaching. We prepare them for effective media exposure.

We are building bridges across generational, relational, and gender gaps which abortion has fractured.

For such a time as this.
